# QUEENSLAND'S NEXT EMERGING COPPER PRODUCER

---

Pat Williams  
Managing Director

J P Equity Partners

Emerging Producers Investor Briefing

16 March 2023, Perth, Western Australia

# Important notice and disclaimer

**Revolver Resources Holdings Ltd (ACN 651 974 980) (Revolver or the Company)** is the issuer of this presentation. The issue of this presentation is intended only for the person or entity to which it has been transmitted.

## **Not a disclosure document**

The purpose of this presentation is to provide general information about the Company only. This presentation is not a disclosure document for the purpose of Chapter 6D of the *Corporations Act 2001* (Cth) (**Corporations Act**) and does not purport to include the information required of such a disclosure document. It has not been lodged with or approved by any regulatory authority, such as the Australian Securities and Investments Commission or the Australian Securities Exchange.

## **Competent Person Statement**

The information in this report that relates to Exploration Results is based on, and fairly represents, information compiled by Dr Bryce Healy (PhD Geology), a Competent Person who is a member of the Australasian Institute of Geoscientists (AIG No: 6132). Dr Healy is a Principal Geologist and Chief Operating Officer (COO) for Revolver Resources Ltd (Revolver) has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Dr Healy consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.

## **No New Information or Data**

This announcement contains references to exploration results, Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information derived from the production targets, all of which have been cross-referenced to previous market announcements by the relevant Companies. Revolver confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements. In the case of Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information derived from the production targets, all material assumptions and technical parameters underpinning the estimates, production targets and forecast financial information derived from the production targets contained in the relevant market announcement continue to apply and have not materially changed in the knowledge of Revolver.

This document contains exploration results and historic exploration results as originally reported in fuller context in Revolver Resources Limited ASX Announcements -as published on the Company's website. Revolver confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements. In the case of Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information derived from the production targets, all material assumptions and technical parameters underpinning the estimates, production targets and forecast financial information derived from the production targets contained in the relevant market announcement continue to apply and have not materially changed in the knowledge of Revolver. Refer to Annexure A of the presentation for the Company releases referred to in this presentation.

## **No other material authorised**

The Company has not authorised any person to give any information or make any representation in connection with any proposed offer of securities. A prospective investor cannot rely upon any information or representations not contained in this presentation.

## **Nature of mineral exploration risks**

This presentation does not purport to be all-inclusive or to contain all the information that you or any other party may require to evaluate the prospects of the Company. The mineral tenements of the Company as described in this presentation are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings. Some of the tenements are in the application stage only and there is no guarantee the applications will be granted by the responsible minister or governmental decision maker having jurisdiction. There can be no assurance that exploration of the tenements, or any other tenements that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

## **Forward-looking statements**

This announcement contains "forward-looking statements". All statements other than those of historical facts included in this announcement are forward looking statements. Where a company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements re subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, copper and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. Neither company undertakes any obligation to release publicly any revisions to any "forward-looking" statement.

## **Reliance on presentation**

A recipient of this presentation must make their own assessment of the matters contained herein and rely on their own investigations and judgment in making an investment in the Company. This presentation does not purport to contain all of the information a recipient of this presentation requires to make an informed decision whether to invest in the Company. Specifically, this presentation does not purport to contain all the information that investors and their professional advisers would reasonably require to make an informed assessment of the Company's assets and liabilities, financial position and performance, profits, losses and prospects.

## **Not a recommendation or financial advice**

The information in this presentation is not a recommendation to subscribe for securities in the Company and does not constitute financial advice. Any person who intends to subscribe for securities must conduct their own investigations, assessment and analysis of the Company and its operations and prospects and must base their investment decision solely on those investigations and that assessment and analysis. Prospective investors should consult their own legal, accounting and financial advisers about an investment in the Company.

# World class assets serving a bull copper market.

## BULL MARKET

World's electrification is forecast to dramatically increase copper demand.

Projected copper price  
> US\$10,000

## TIER ONE ASSETS

Two copper projects with district scale potential.

**Dianne** - major acreage expansion, JORC resource.

**Osprey** – world-class minerals postcode.

## NEAR-TERM PRODUCTION POTENTIAL

High-grade, high recovery, near surface ore on granted Mining Leases at Dianne Project.

## MAJOR EXPLORATION UPSIDE

Clear regional trends with more than 40 high priority VMS drill targets.

Evident IOCG mineralisation at Project Osprey.

## Share price

**\$0.22**

# Highly Experienced Board and Management

**Pat Williams**  
Managing Director

Worked in the global resources business for more than 30 years where he has held senior roles with several international mining operations from the front line through to the boardroom. Working through a range of senior production and management roles with BHP and Anglo American, Pat gained a strong operational management expertise over a 15 year duration. As Director and co-founder of Ranger Resources Pty Ltd, Pat has demonstrated the aptitude and critical skills needed to identify and grow a portfolio of emerging high value natural resource assets.

**Paul McKenna**  
Executive Chairman

Over 30 years in technical, commercial and corporate roles in the energy and resources industry. Having previously served in senior and executive roles for top tier Australian energy companies (including Energex, Citipower, Ergon Energy, Enertrade, Arrow Energy, Coal of Queensland and Territory Gas), he has proven expertise in advancing resource projects towards production readiness and sustainable profitability. He currently also serves as the Chairman of Northstar Energy Limited.

**Brian McDonald**  
Non-Executive Director

A professional engineer, and a highly experienced Company Director and executive in the Australian mining and resources industry. His 30 plus year career is highlighted by roles as Managing Director of Vale Australia, Managing Director of AMCI Australia, Coal Group CEO of MIM Holdings, Director of the Mount Isa Mines operating group companies, and Senior Executive within the Thiess Group. Brian also served as a Director of the Queensland Mining Council, Australian Coal Association and the Australian Coal Industry's Research Program (ACARP).

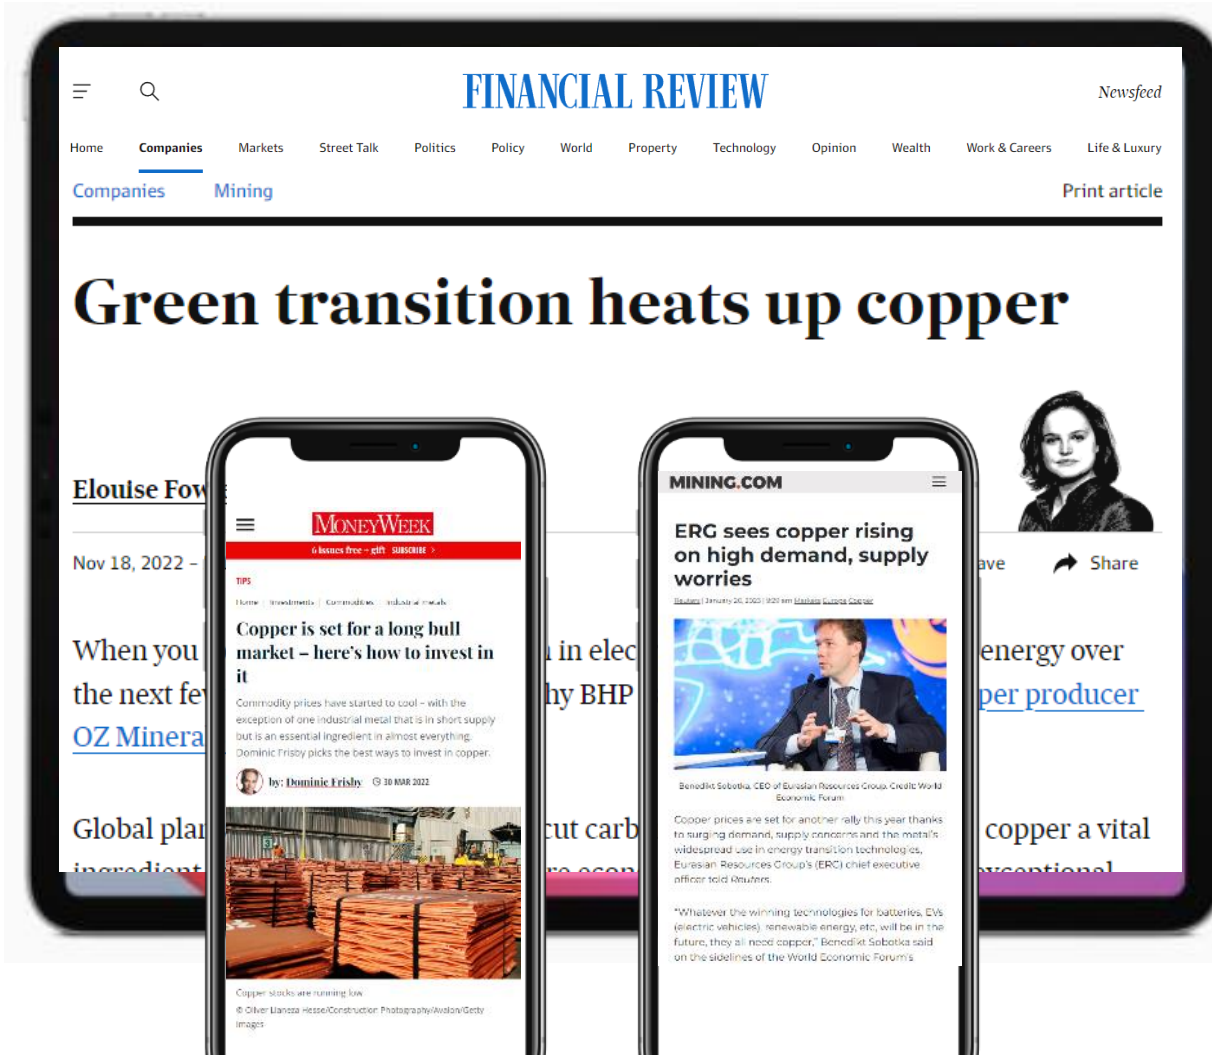

**Bryce Healy**  
Chief Operating Officer

Broad technical background across multiple commodities including precious metals, base metals and bulk commodities specialising in structural geology and geological mapping, geological modelling, geophysical interpretation, alteration and geochemistry analysis, target generation and prospectivity analysis. He also brings considerable project management experience and commercial acumen having managed multi-disciplinary teams in asset valuations and due diligence, exploration budgeting, and portfolio development.

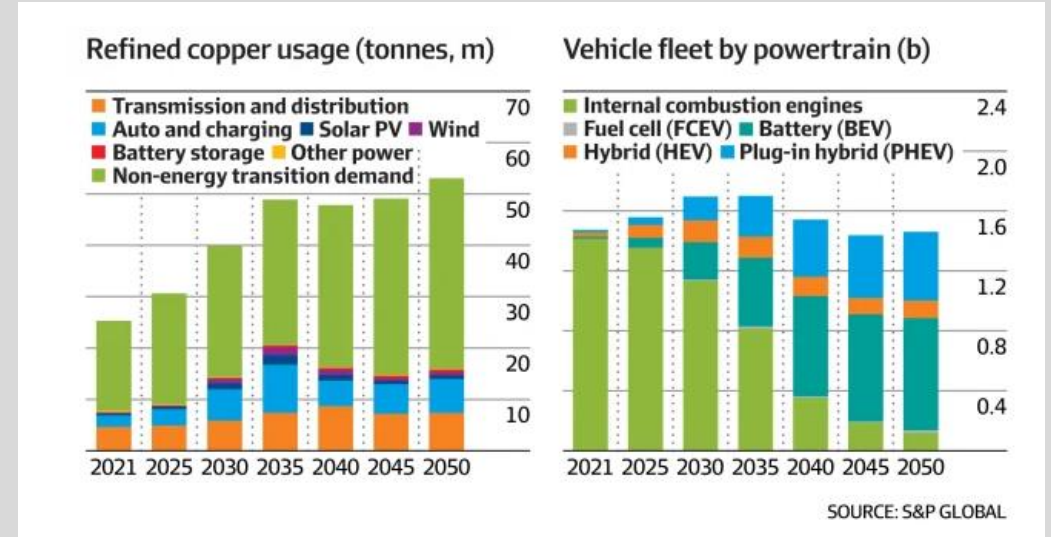

# Copper's Golden Age

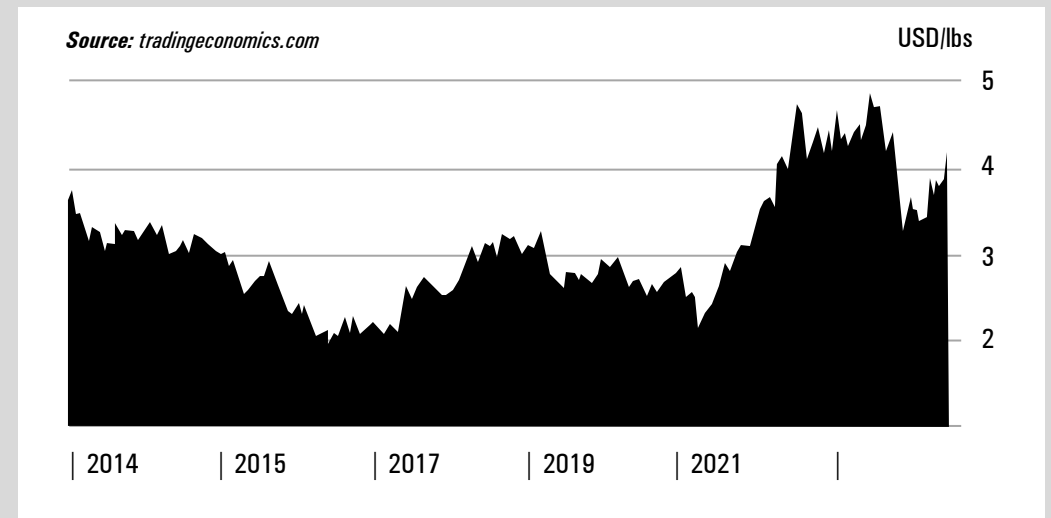

## World's electrification needs copper

## Copper demand to double by 2050

## Bullish copper price

# Two outstanding district-scale copper projects.

## Project Osprey

Targeting IOCG and Mt Isa Style copper deposits within the North-West Minerals Province, one of the world's richest mineral producing regions.

Existing sample analysis shows evidence of IOCG mineralisation.

NORTHERN TERRITORY

## Project Osprey

## Dianne Project

## Dianne Project

Former high-grade copper mine - 63,758t of shipped ore with an average grade of 22.7% copper.

Lucrative near-term production potential.

Compelling district scale exploration upside.

## Total JORC Resource

**18,000t of Cu**

1.62Mt @ 1.1% Cu with 6.1% sulphide core

Mount Isa

Cloncurry

QUEENSLAND

Townsville

Mackay

Cooktown

Cairns

## Dianne Project

Lakeland

Dianne Mine

Cairns

-  Granted acreage
-  Under application
-  Mine
-  Town

25km

# Dianne Project

## Hodgkinson Province, North Queensland

Unlocking value from one of Australia's highest grade, low cost copper assets.

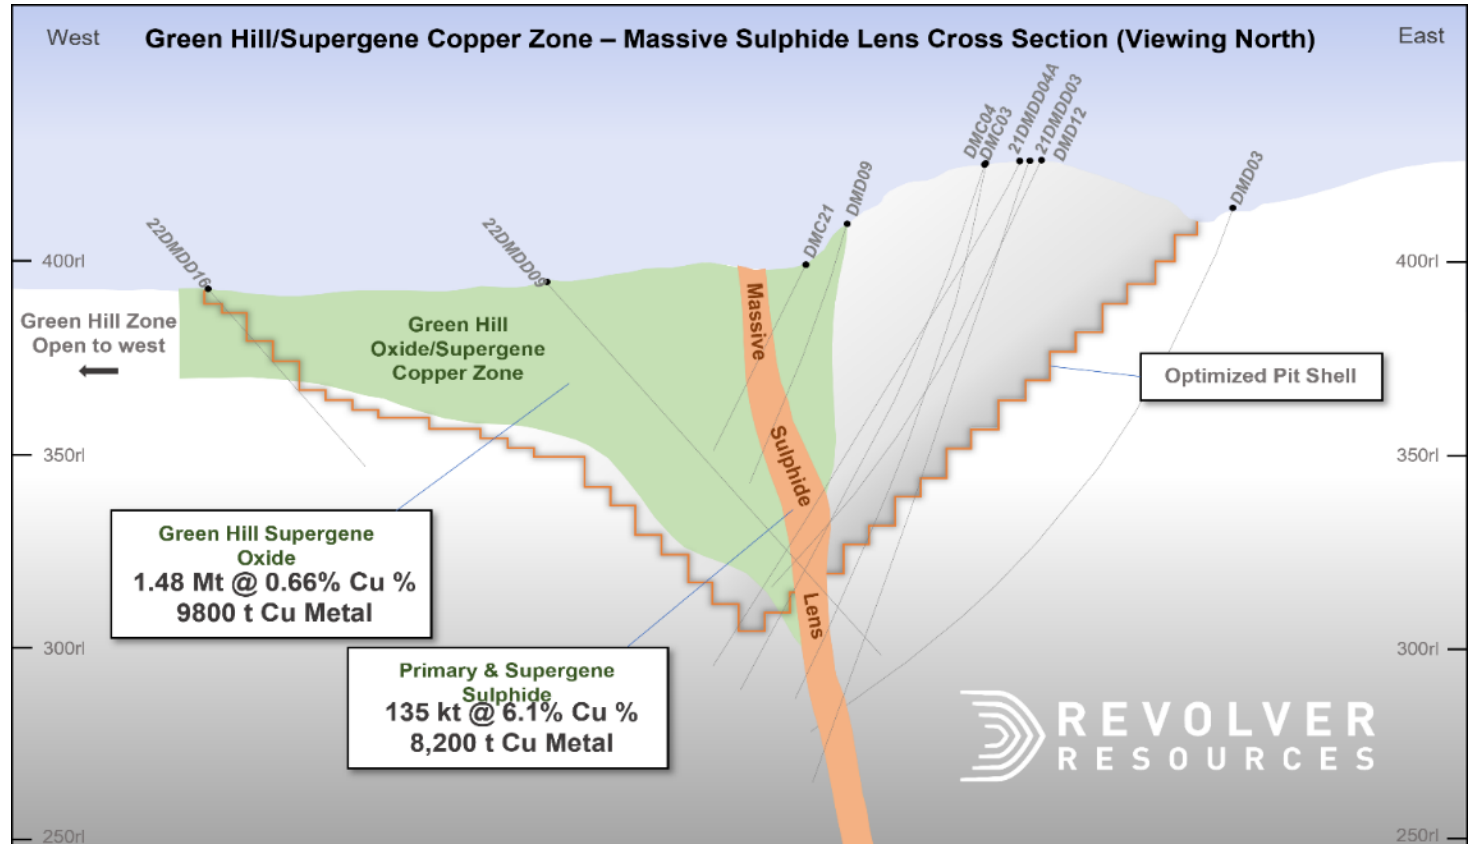

- Revolver drilling delivers JORC resource containing broad surface copper oxide mineralisation adjacent to high-grade massive sulphide zone with assays up to **19.8% Cu.**
- Near-term production planning has commenced.
- Significant high potential regional exploration upside.

# Dianne near-term production study

High-grade, high recovery, near surface ore on granted Mining Leases.

- Metallurgical test work shows over 90% recovery potential.
- Potential for a combined open-pit development of the oxide, supergene and remaining primary massive sulphide mineralisation.
- Mine recommencement study completed.
- Significant upside potential remaining in JORC resource

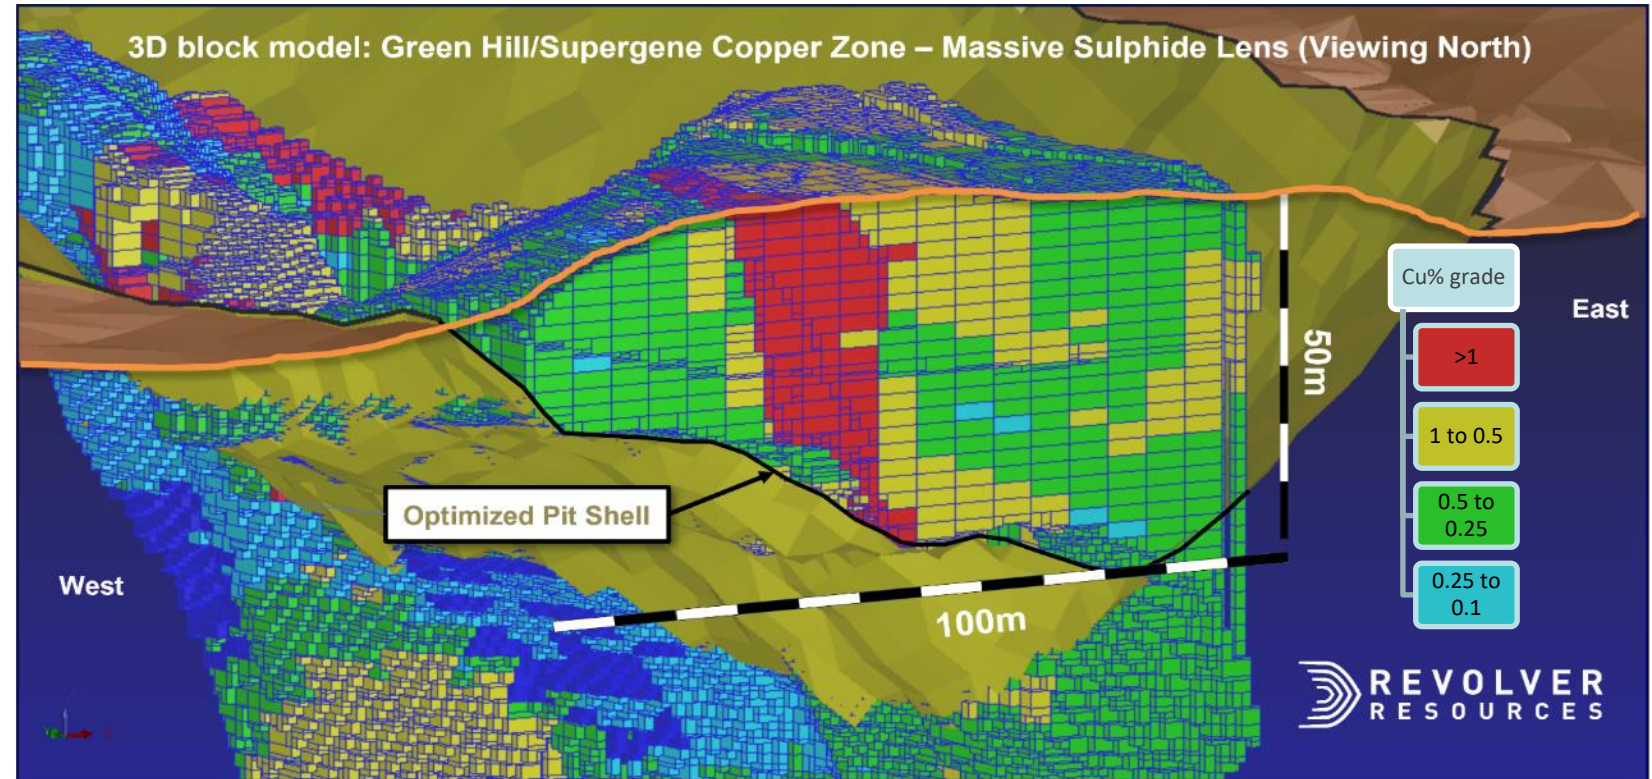

Green Hill Supergene Oxide  
1.48 Mt @ 0.66% Cu %  
9800 t Cu Metal

Primary & Supergene Sulphide  
135 kt @ 6.1% Cu %  
8,200 t Cu Metal

## Streamlined pathway to production.

- Compact scale – quick to bring into operation.
- Contract mining suitable – greatly reduced Capex.
- Modular proven process potential – reduce construction risk and timeline.
- Entire orebody contained within granted Mining Leases.

### Green Hill Oxide

High extraction of **90.4%** of the copper with fast leach kinetics.

### Supergene Massive Sulphide

Concentrate grade of 25.2% copper at **82.5%** recovery.

### Primary Massive Sulphide

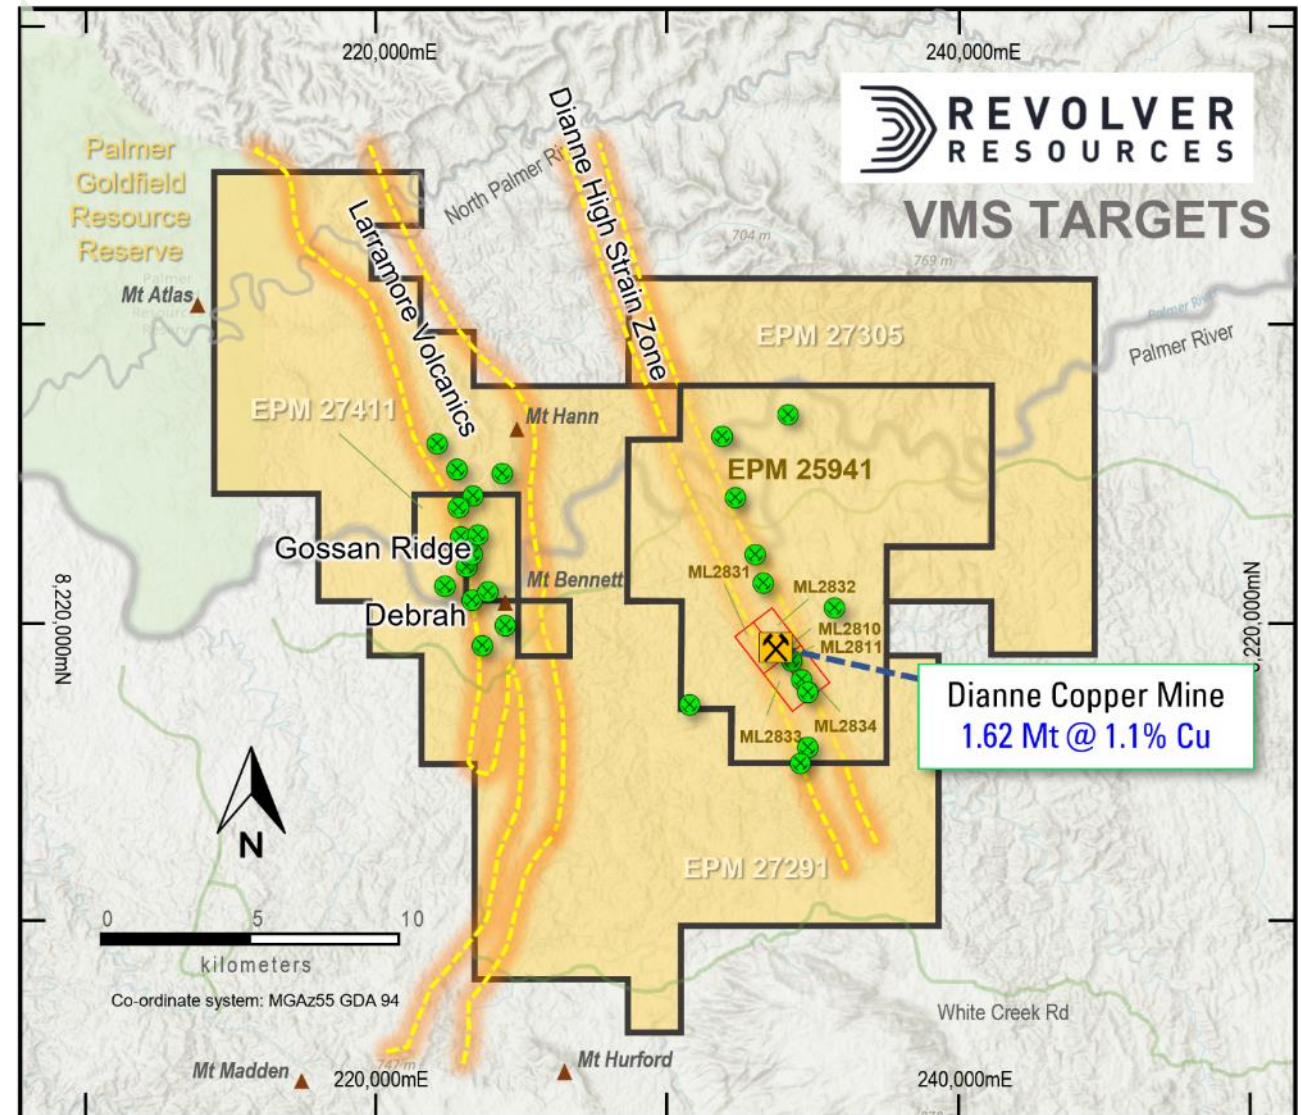

Concentrate grades of 21.6% copper at **81.9%** recovery and 48.9% zinc at **72.8%** recovery.

# Emerging copper province

Over 40 high priority drill targets identified

Strong conductive anomalies identified across permit area with similar signatures to existing pit orebody.

- Larramore Volcanic Trend and Dianne High Strain Zone represent significant regional growth opportunities.
- Clear regional scale trend confirmed by Heli-EM, soils, surface geology and geochemical analysis.
- Proximate location to Dianne Pit suits regional potential for nearby satellite operations with pits 10-15km from central processing.
- Focused M&A has secured over 860 km<sup>2</sup> continuous highly prospective permit area.

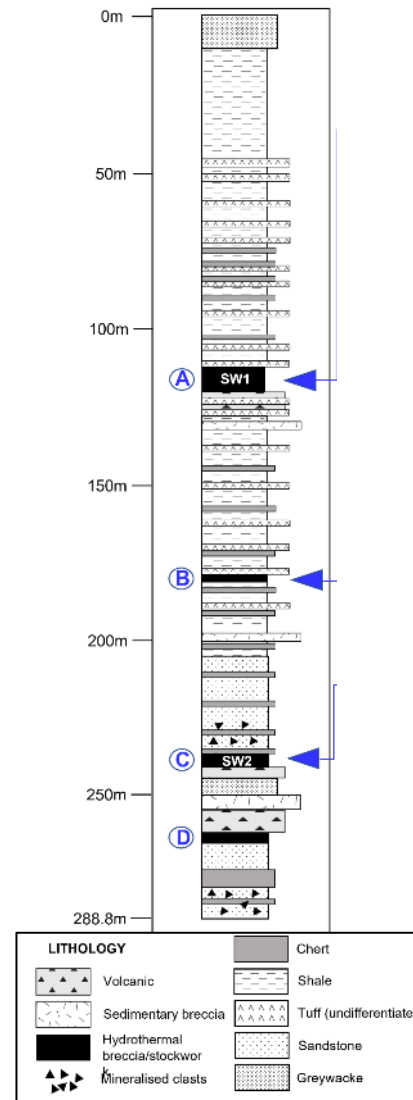

# Emerging copper province

## Step out VMS mineralisation discovered

### Diamond drilling intersects extensive VMS mineralisation in the first Heli-EM target across the new Larramore Volcanic Belt.

- Several intersections of intense classic VMS stockwork mineralisation across a number of down hole intervals (see right).
- Pervasive sulphide mineralisation across more than 260 meters of the 290 meter drill hole length.
- Clear indication of a large scale hydrothermal system less than 10km from the existing Dianne deposit.
- Further 15 high priority EM targets in this region. DHEM surveys underway.

# Two outstanding district-scale copper projects.

## Project Osprey

Targeting IOCG and Mt Isa Style copper deposits within the North-West Minerals Province, one of the world's richest mineral producing regions.

Existing sample analysis shows evidence of IOCG mineralisation.

NORTHERN TERRITORY

## Project Osprey

## Dianne Project

## Dianne Project

Mount Isa

Cloncurry

QUEENSLAND

Townsville

Mackay

Cooktown

Cairns

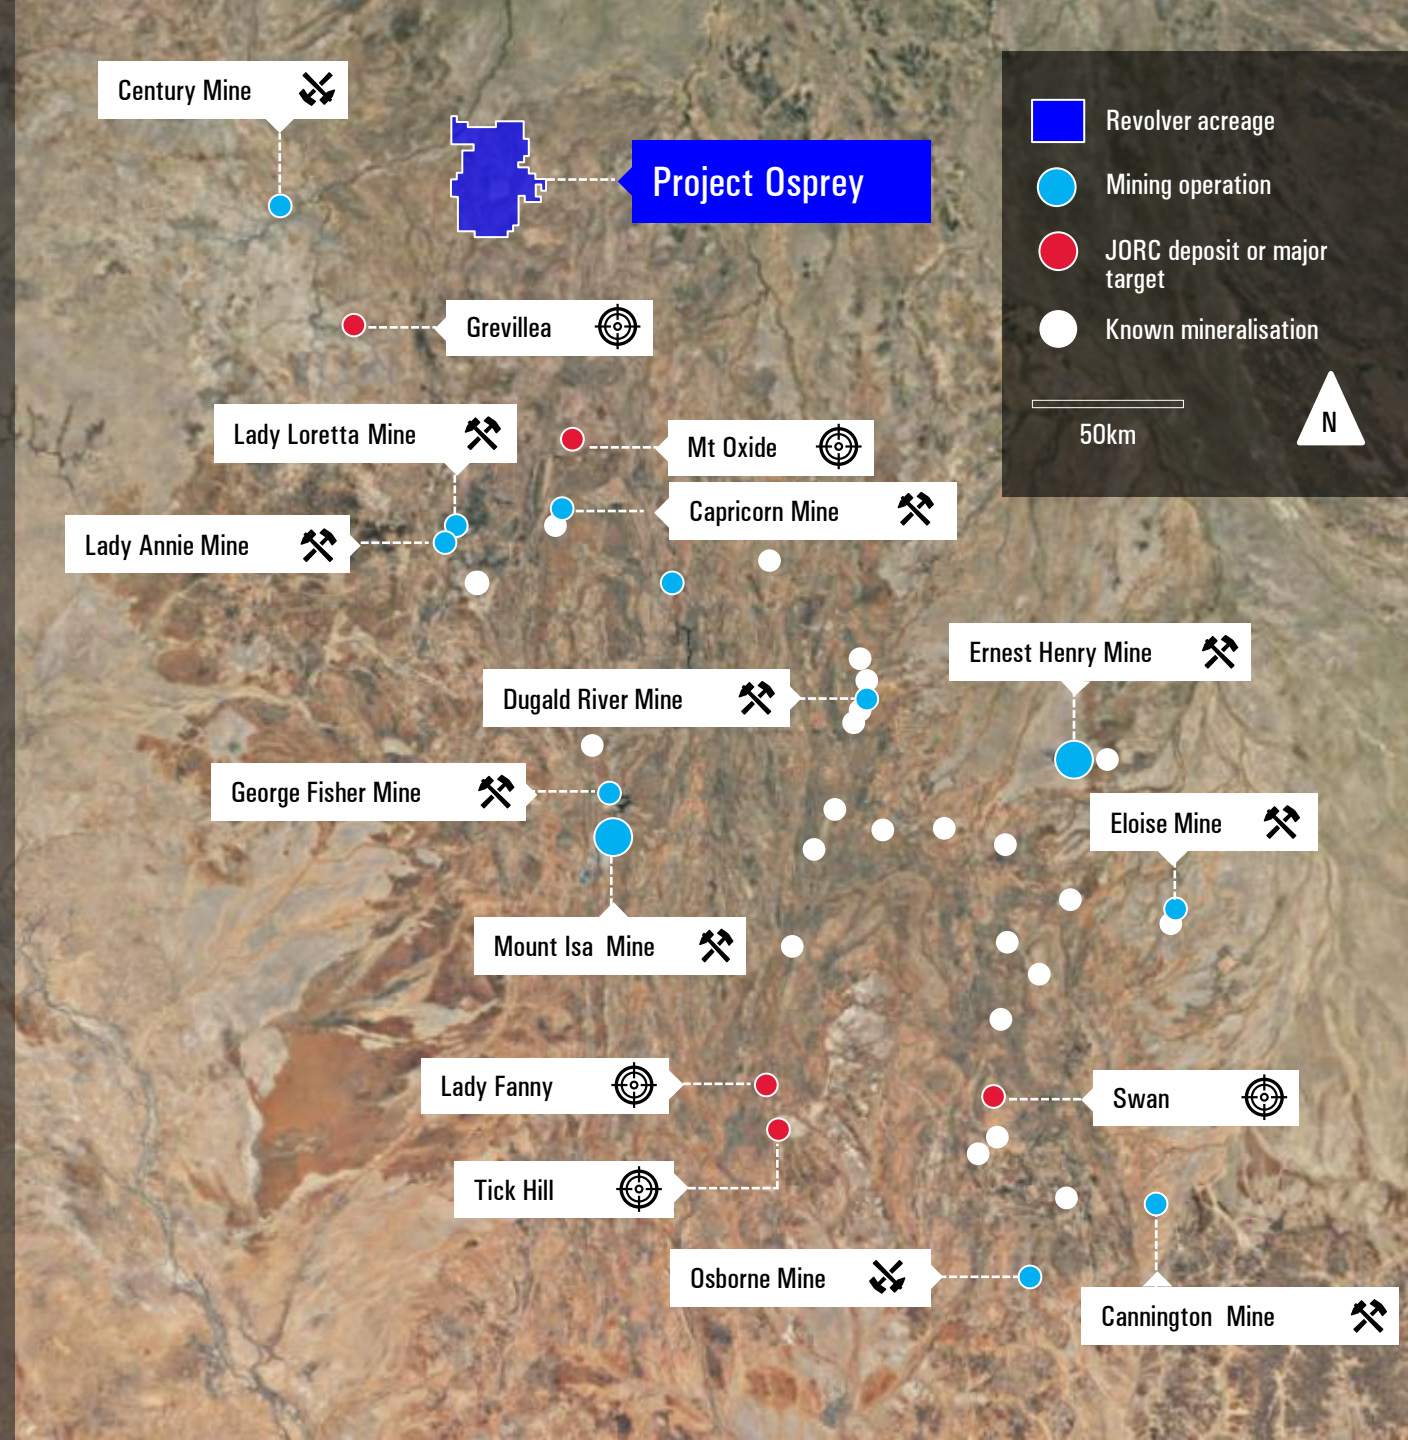

# Project Osprey

## Tier one copper potential

- Hosted in a covered extension of the Mt Isa Inlier.
- Relogging and analysis determined Iron Oxide Copper Gold (IOCG) halo style alteration and mineralisation in Revolver drill core.
- Mt Isa IOCG examples include world class Cu-Au deposits – Ernest Henry Mine, Osborne Mine, Swan Mine.
- Targeting large scale IOCG and Mt Isa style deposits
- Recent re-logging produced > 500 drill core samples for assaying.

Image: Modified from Northwest Qld Mineral Province Deposit Atlas

IOCG Resources from Geological Survey of South Australia IOCG Mineral Systems Workshop 02 - 03 December 2019 Cu-Au mineralisation of the Cloncurry district: Recognizing diversity within a mineralised province Presented by: Glen Little  
 Capricorn Copper resource from 29metals presentation Dec2021, Lady Loretta resource from Austral Resources Company Presentation, Dec2021

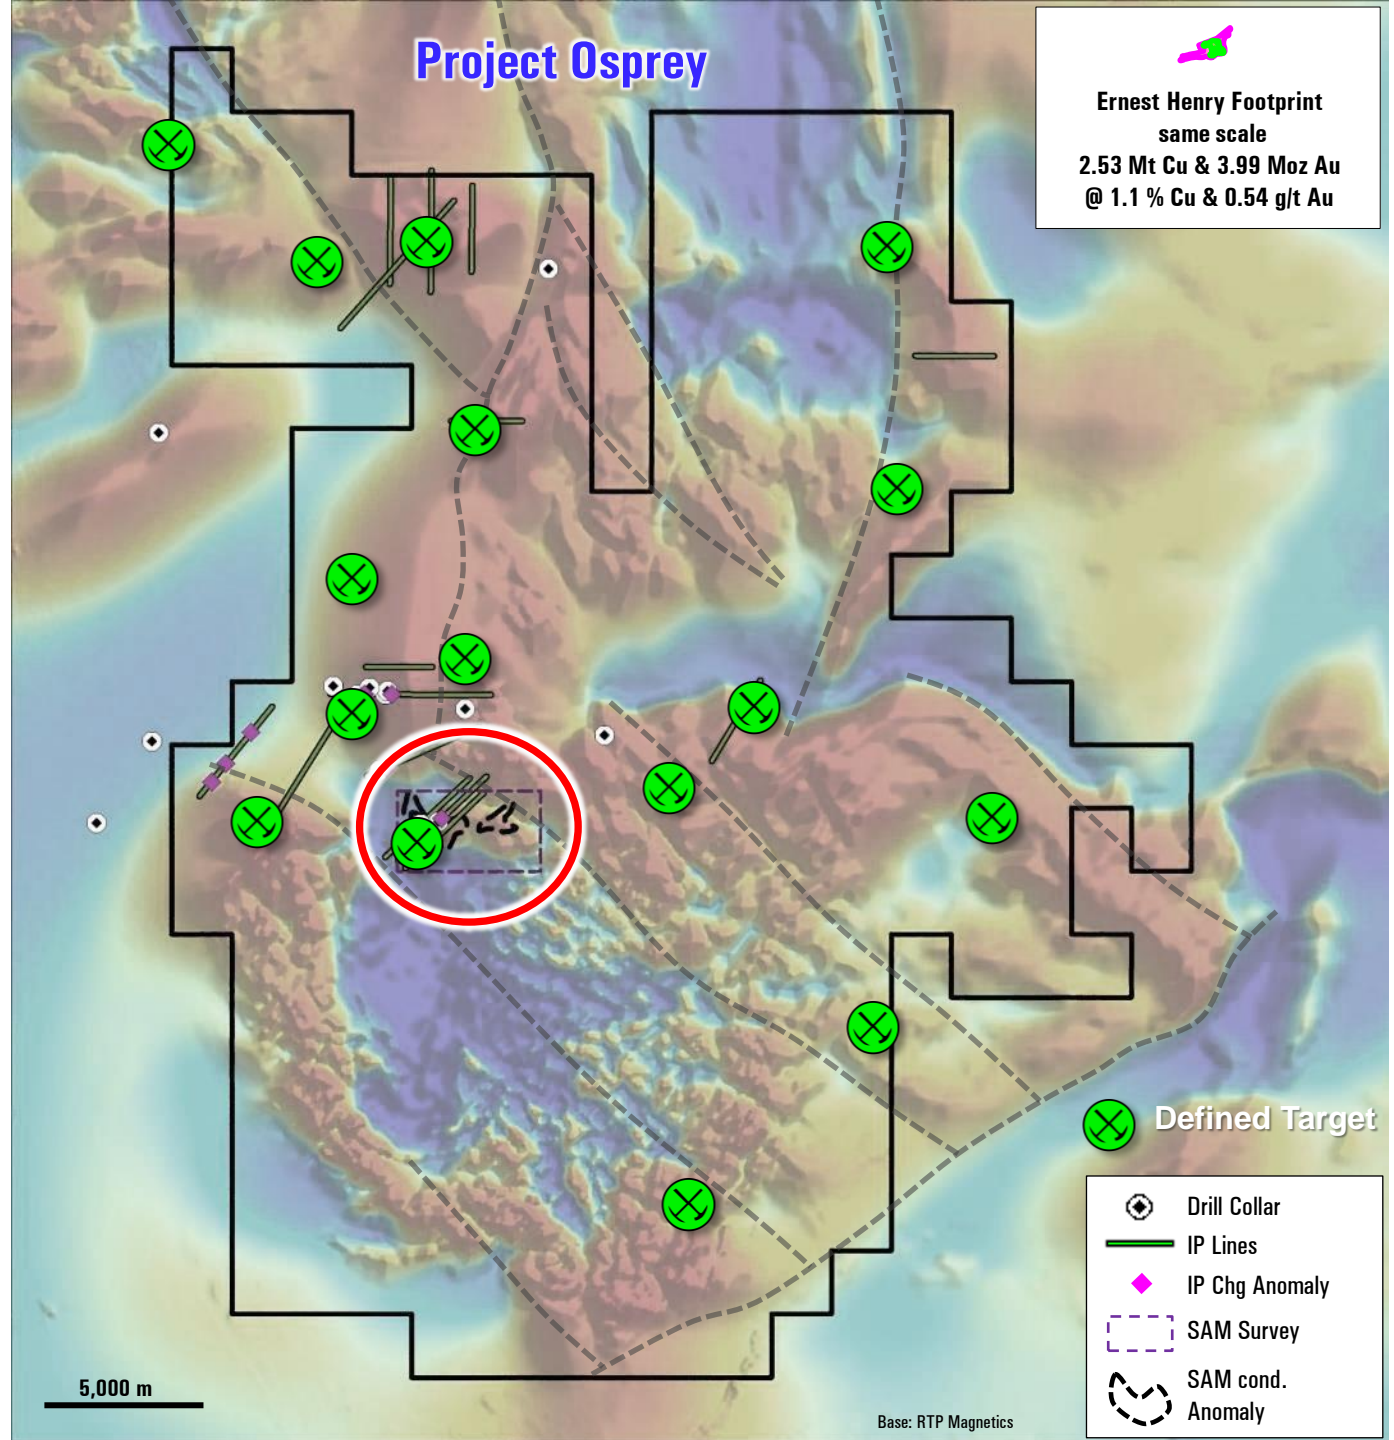

# IOCG potential

Large exploration dataset for integrated targeting

Revolver drill core shows copper mineralisation associated with IOCG alteration facies.

- Substantial amounts of modern exploration data have been assembled at Osprey:
  - > **4500m** drill core
  - 200 line km of ground magnetics
  - 651 gravity station measurements
  - 46.1 line km PDP-IP and 10 sq km of Samson EM
- Project wide data modelling and AI processing are being used to prioritise drill targets for early 2023.

# Drilling results

## Evidence IOCG alteration and mineralisation

- Osprey sparsely drill tested with direct evidence of IOCG/Capricorn Copper Style Cu +/- Ag +/- Co mineralisation.
  - Copper-Cobalt signature associated with Fe Oxides and elevated phosphorus and arsenic
  - Alteration minerals include epidote, K-feldspar, actinolite, biotite, paragonite/muscovite/phengite and graphite.
  - Ore mineralogy includes hematite, pyrite, magnetite and chalcopyrite with some bornite.
  - Possible distal parts of a Capricorn Copper Cu-Ag-Co style system or IOCG system
  - Airborne geophysics planning for drilling into new targets identified in integrated interpretation

### Osprey Peripheral IOCG Alteration

K-spar-hematite-pyrite alteration and veining

- +750 Alteration mineral spectral measurements

### Osprey IOCG Mineralisation

(Chalcopyrite, pyrite)

- Relogging/resampling complete + 500 assays pending multi-elements, Au and REE for advanced lithogeochem mineral vectoring,
- Assays augmented by + 1500 pxrf readings

# Project Osprey

## A region of strategic focus

---

### Strong interest by majors in the areas immediately adjacent to Osprey.

- Clear evidence of the presence of Eastern Creek Volcanics.
- Major regional structure provides ideal host environment for significant mineral deposition.
- Regional exploration “under cover” of 50m up to several hundred meters. Revolver permits over the shallowest basement cover.
- Revolver has completed multiple scopes of recent exploration and holds a significant dataset of regional knowledge.

# Growth Catalysts

A track record of constant proven performance

## Previous operators

## Revolver start

## Revolver IPO

*The timetable presented is indicative only and is subject to change.*

### Dianne Project

**1978 - 1982**

Dianne Mine operations.  
Average ore grade 22.7% copper

**1990s**

**KEC Mining**  
Regional exploration

**2000s**

**BHP/WMC**  
Regional geology and drill campaigns establish prospectivity

### Project Osprey

**1990s**

**Anglo/Shell**  
District exploration in osprey region

### Project Osprey

**2015**

Initial transaction

**2016**

Ground gravity/mag

**2017**

Diamond drilling  
Ground gravity mag

**2018**

IP geophysics

**2019**

Diamond drilling  
Ground gravity mag  
Ground EM survey

**2020**

IP geophysics

**2021**

Diamond drilling

### Dianne Project

**2019**

Initial transaction  
EPM 25941 awarded

**2017**

Diamond drilling  
Ground gravity mag

**2020**

Ground mag survey  
Regional rock chip sampling and geochem analysis  
Ongoing environmental rehabilitation  
Financial assurance payment  
Waste rock sampling  
RC drilling

### Dianne Project

**2022**

Worldview satellite imaging

Diamond drilling

JORC MRE

Metallurgical studies

Regional soils/rock chip, geological mapping

Geochem analysis & Petrology

Regional Heli-EM

M&A acquisition

District aggregation

**2023**

Mine feasibility  
Operations preparations  
Diamond and RC drilling  
District scale ground geology  
Heli gravity  
Regional soils/rock chip, geological mapping  
Heli EM

**2024**

Pre-mine planning  
Capital works  
Diamond & RC drilling  
Upgrade JORC MRE  
Regional soils/rock chip, geological mapping  
Satellite pit planning

### Project Osprey

**2022**

Core relog and assay  
Regional Heli-EM

**2023**

Diamond drilling  
Regional Heli-EM  
AI integration

**2024**

Diamond drilling  
Alteration modelling and evaluation  
AI integration

---

## Queensland's Next Emerging Copper Producer

**Revolver is progressing two 100% owned, world class copper projects on a dual-track growth trajectory.**

- **Dianne Production - High grade JORC resource at surface drives planning towards near term production.**
- **Dianne Exploration – District scale opportunity with more than 30 high potential drill targets across major regional geological trends.**
- **Project Osprey – clear signs of IOCG and Mt Isa mineralisation within world-class minerals province.**
- **The world needs more copper. We will supply it.**

# THANK YOU

QUEENSLAND'S NEXT EMERGING  
COPPER PRODUCER
