

Dianne Mining Company

The Dianne Copper Mine is owned by Dianne Mining Corporation Pty Ltd (DMC) with the Environmental Authority (EA) EPML00881213.

The Dianne Mine infrastructure including Raw Water Dam 1, Raw Water Dam 2 and the access road as detailed on the map, figure 1 below, have been utilised by Bonny Glen Station for many years.

After mine closure, we confirm as Leaseholder of Bonny Glen Station that we wish to retain these important assets.

Note the map below does not show the access road in full, we intend to keep the entire access road from the Whites Creek Road (Maytown Road) turnoff to the Dianne Mine site area.

Signed

Lf Conry.

Dear Mr. Williams

I am writing on behalf of the Western Yalanji Aboriginal Corporation to express our strong support for Revolver Resources in their efforts to recommence operations at the Dianne Copper Mine. We believe that this endeavor holds significant potential not only for your company but also for our local community and the broader region.

The Dianne Copper Mine, located within the traditional lands of the Yalanji people, has a history that stretches back generations. It has provided economic opportunities, employment, and valuable resources to our community for many years. We recognize the importance of responsible and sustainable mining operations, and we appreciate Revolver Resources' commitment to environmental stewardship and community engagement.

As we consider the prospect of reopening the Dianne Copper Mine, we are confident that Revolver Resources will continue to uphold the highest standards of environmental protection and community well-being. Your company's track record of working closely with local communities, respecting cultural heritage, and contributing to social development aligns with our values and aspirations.

We acknowledge that the resumption of mining activities may pose challenges, and we encourage open and transparent communication between Revolver Resources and our community to address any concerns that may arise. We trust that you will prioritize safety, environmental sustainability, and the welfare of our people throughout the entire process.

The potential benefits of reopening the Dianne Copper Mine are manifold, including job creation, economic growth, and opportunities for local suppliers and businesses. These benefits will not only strengthen the Western Yalanji Aboriginal Corporation but also enhance the overall well-being of our community members.

In conclusion, we offer our wholehearted support to Revolver Resources in their endeavor to recommence operations at the Dianne Copper Mine. We are excited about the prospect of working together to create a future that is both prosperous and sustainable for our community and the surrounding region.

Please do not hesitate to reach out if you require any further information or if there is any way in which we can collaborate effectively to ensure the success of this project. We look forward to a positive and productive partnership.

Sincerely,

Brad Grogan
